

# Kessler-Ellis Products

## Environmental Management Policy

Kessler Ellis Products is committed to operate all of its facilities in an environmentally sound and responsible manner.

Kessler Ellis Products will strive to minimize the impact of its operations on the environment through the continuous improvement of its environmental performance and the implementation of pollution prevention measures, both to the extent feasible and practicable in a manner that is consistent with Kessler Ellis Products' overall mission and goals.

To successfully implement this policy Kessler Ellis Products will develop and maintain management systems that will:

- Ensure that the environmental management policy is available to staff, customers, and the general public.
- Ensure compliance with all applicable environmental laws and regulations.
- Ensure that environmental considerations are included in business, financial, operational and programmatic decisions, including feasible and practicable options for potentially exceeding compliance with applicable regulatory requirements.
- Define and apply sustainable design principles in the planning, design operational, and decommissioning of its facilities.
- Provide communication with staff regarding environmental goals, objectives, and targets and their respective roles and responsibilities in fulfilling them.
